

BEAUTY FOCUS™

COLLAGEN +

A peach flavored supplement drink that kickstarts collagen and elastin production

Clinicals

Through a double-blind, placebo-controlled clinical study commissioned by Nu Skin, Nu Skin found that participants that received Beauty Focus Collagen+ experienced improvement in texture, radiance, and overall appearance of their skin.

Collage+ helps prepares the skin for improved complimentary benefits from topical products including ageLOC LumiSpa. In the same four-month study, when Beauty Focus Collagen+ was used daily with ageLOC LumiSpa, visible results improved even more, showing complementary benefits from using both products at the same time.

Availability: NuSkin.com

Price: \$150 MSRP

Launch date: September 2021

Nutrition Information: 20 Calories per 1Fl Oz pouch.

Made with a naturally delicious peach flavor and zero artificial colors, flavors, or sweeteners

How to use: Drink one Collagen+ pouch daily for optimum results

Key Ingredients

Bioactive Collagen Peptides®: Elite collagen peptides featuring a unique peptide “fingerprint” that is shown to effectively stimulate collagen and elastin production. These collagen peptides are from type-1 bovine collagen, sourced from predominantly pasture-raised cows with grass and mixed-vegetable diets.

Lutein: Not typically found in beauty supplements, this important carotenoid is derived from marigold flowers. Lutein promotes skin’s radiance and further helps protects it from oxidative stress, including blue light.

Phytoceramides: Taken from wheat lipid extract, Beauty Focus Collagen+’s Phytoceramides are similar to the ceramides (or naturally-occurring, long-chain fatty acids) found in skin. They help keep skin’s moisture barrier healthy and hydrated all day long.

Benefits + Results

- Boosts collagen and elastin production in your skin.*
- Supports skin hydration and healthy moisturization.*
- Supports in visibly diminishing fine lines and the appearance of wrinkles.
- Helps protect against the damaging effects of oxidative stressors, including blue light.
- Increases skin carotenoids which provide antioxidant support.
